

Applying configuration changes without downtime brings instant relief.

```
kill -USR1 $(pgrep -  
f openclaw)
```

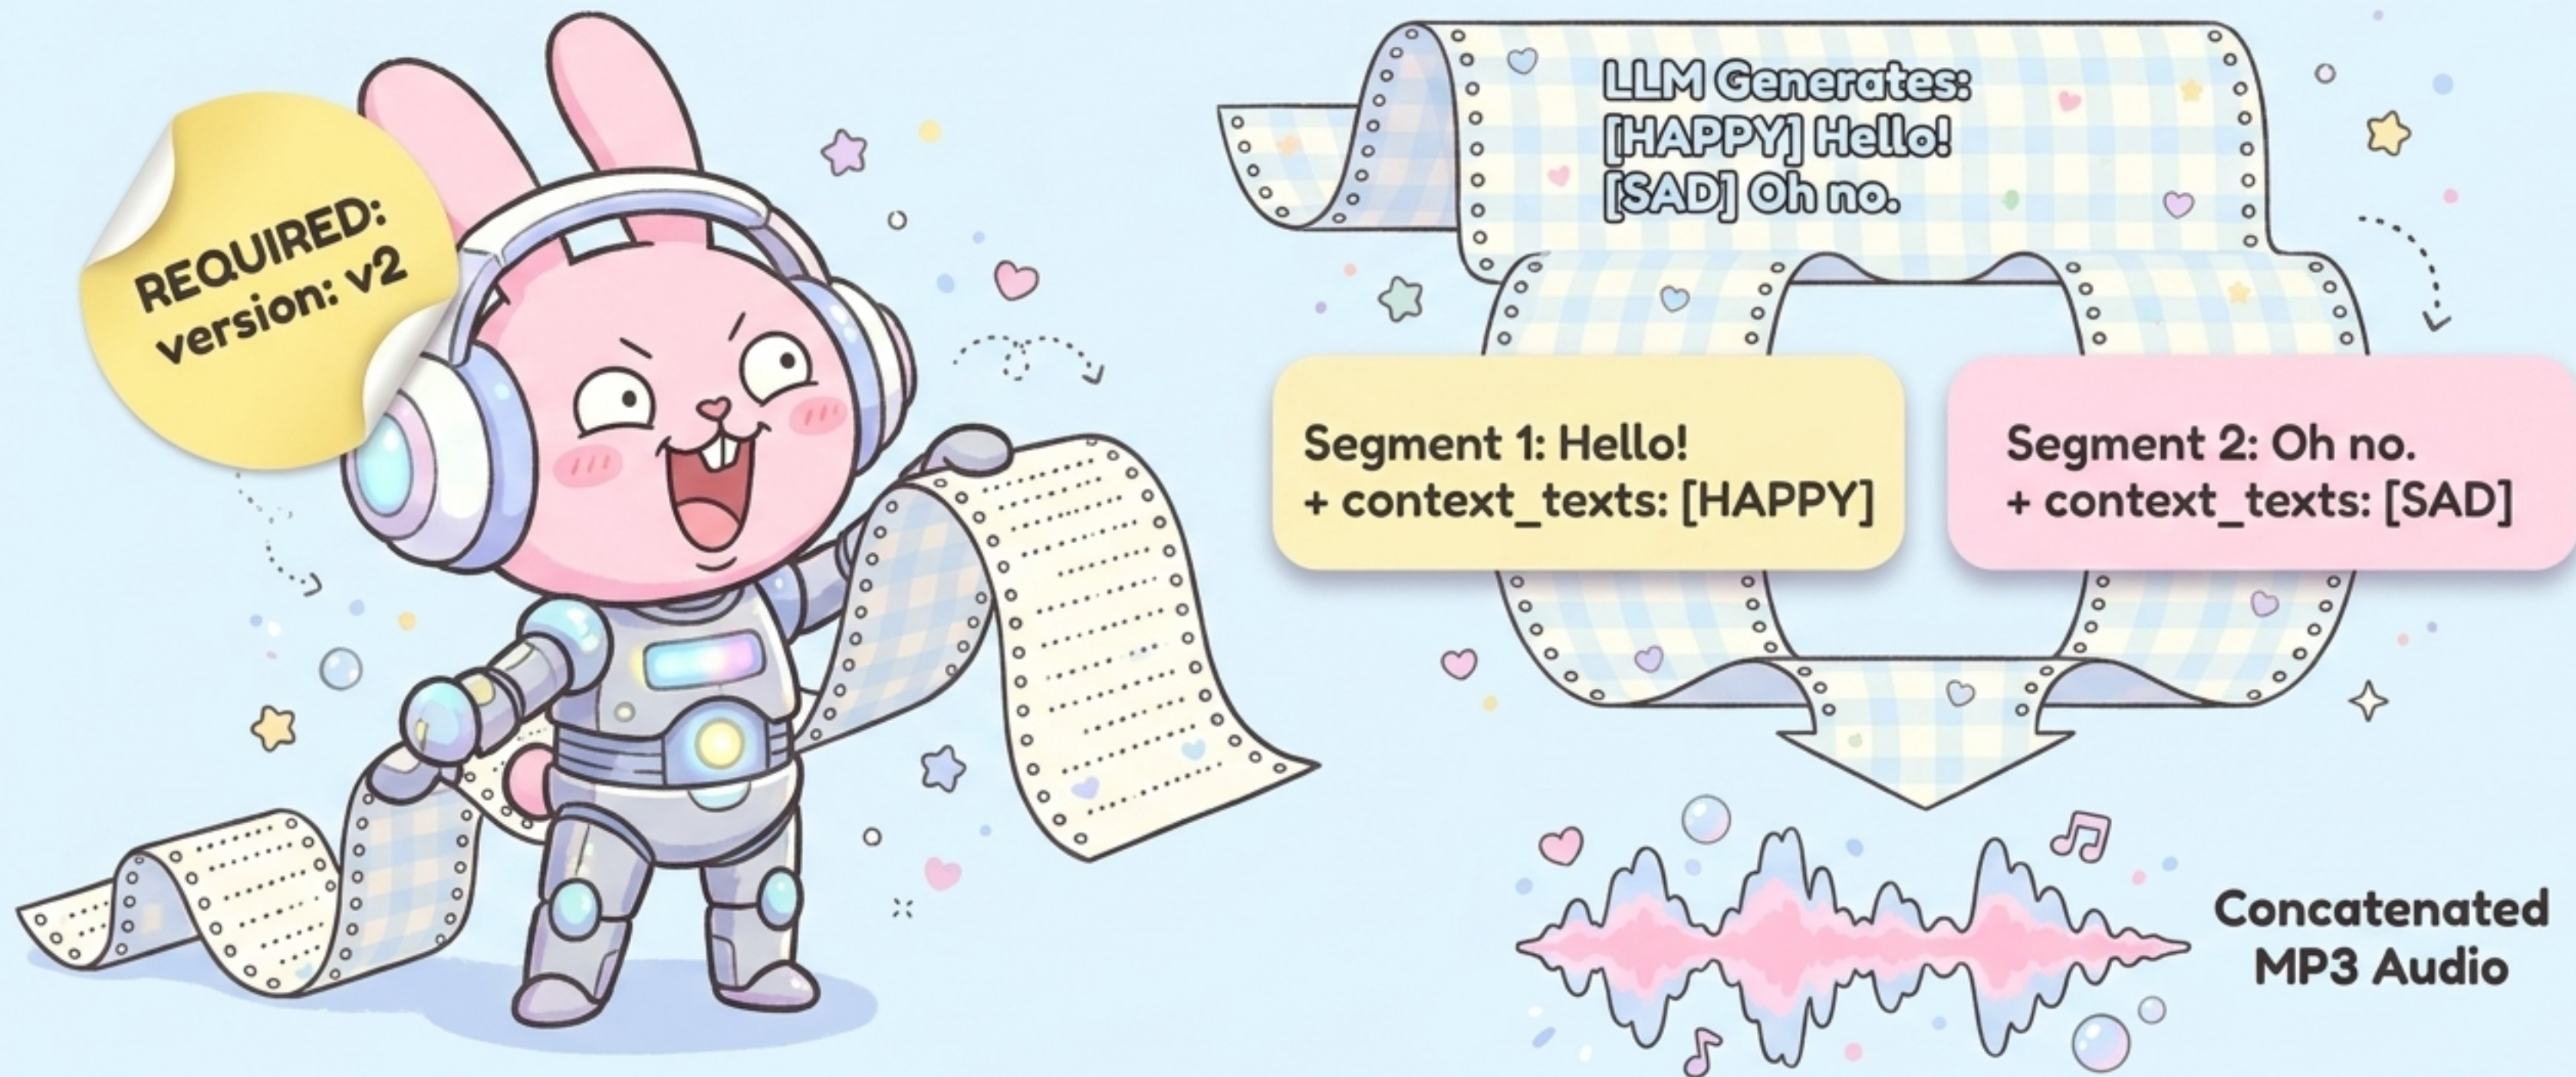

```
{  
  messages: {  
    tts: {  
      auto: always  
    }  
  }  
}
```

Fish Audio outputs native OGG/Opus for seamless voice notes

Volcano Engine v2 parses emotion tags to give the AI a dynamic soul.

Premium voice cloning is backed by a bulletproof fallback cascade.

A clear diagnostic map resolves late-night configuration hiccups.

`/tts status`

The ultimate debug command to check current provider state

Missing
API Key

No audio?

Check auto is not off and API keys are set.

Audio but no emotion?

Ensure version: v2 is active for Volcano.

Not a round bubble?

Check Opus format and voiceCompatible: true.
