17 PRs Merged

Acting as a forcing function for intent and diffable history.

PR Anatomy

Summary

Changes Table

Checkbox Test Plan

The stretch where building features turned into building a business.

M1: Credit Economy Edge Cases

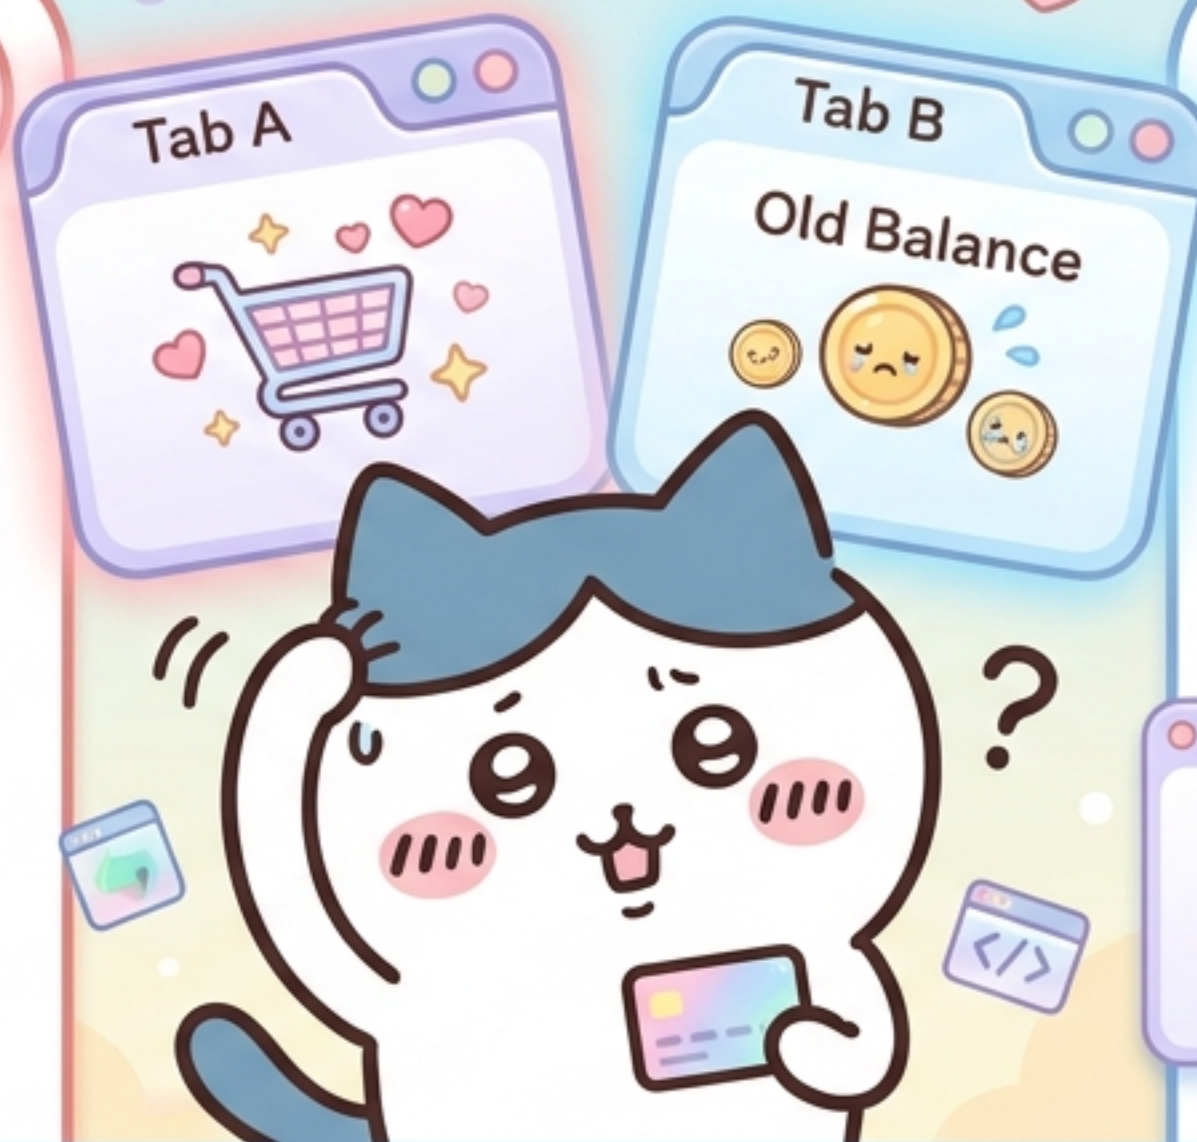

PROBLEM: The Double Charge Glitch

Buy credits in Tab A

Switch to Tab B

See old balance

Double Charge

SOLUTION: Real-time Sync

Supabase Real-time Subscriptions.

Tab A deductions instantly sync to all tabs via WebSocket.

Anonymous-to-Auth Merging:

Redeem codes act as state-machine login credentials to seamlessly merge balances without friction.

M2: Daily Hub Engagement (Instant Gratification)

Flow A:

User Opens App

API Calls
Gemini

3s Spinner

Result

Flow B:

Midnight
Beijing Cron

Pre-generates
to *daily_content*

User Opens
at 8 AM

**0ms Load
(Instant)**

Refining the Astrology Engine

1

Design

Gold-on-dark aesthetic, precise degree tick marks, and interactive tooltips

2

Localization

347-line trilingual i18n dictionary (zh-CN, zh-TW, en) for planets, signs, and aspects

3

Security

Encrypted birth data persistence for Synastry (compatibility) history APIs

M3: The Business Shift

**What feature
should I build
next?**

**What behavior
should I drive
next?**

**Event Tracking: Non-blocking code redemptions using `after()`.
Focus: Conversion funnels, retention hooks, and referral incentives.**

These aren't engineering problems. They're business problems that happen to require engineering.
