

The Depth of a Single, Unbroken Presence

The Tree Hollow

A completely safe, private space designed to just listen, remember, and be present.

Emergent Soul

Zero backstory, no pre-written identity. Personality seeds itself entirely from the first few exchanges.

Real-Time Empathy

WebSocket-first architecture allows the orb to pulse and react mid-sentence.

 Lumi: The Therapist. One companion that knows you completely.

The Breadth of a Diverse Social Circle

Chengdu
girl for
comfort

Sharp best
friend for
honesty

Calm
mentor for
perspective

Mio (Breadth)

Lumi (Depth)

Identity

25 deep identity
files & backstories

No face,
no backstory

Connection

Evolving stages:
strangers to lovers

One continuous,
emergent relationship

Purpose

Novelty, different
people for different
moods

Comfort, processing
heavy emotions
without judgment

A Single Question Mark Routes the Emotional Scope

agentId?: string

Provided

Routes to Mio

Memory is strictly scoped to a specific persona. What you tell the Chengdu girl stays with her.

Omitted

Routes to Lumi

Memory becomes a global, continuous stream for the single companion.

Every shared module in packages/core accepts this optional parameter.
Same pipeline, completely different emotional scoping.

Capabilities Are Universal, Faces Are Unique

Mio Expo App
(25 Faces)

Lumi Expo App
(The Orb)

Hono Server

Packages / Core

MemoryManager
(Universal storage
& retrieval)

EmotionEngine
(Universal emotional
context)

TTS Chain
(Routed by
language)

Guardrails
(Universal
safety)

Parallel Ecosystems Feed the **Same Heartbeat**

80% Effort

Lumi Development

Advancing WebSockets, real-time feel, and emergent personality systems.

20% Effort

Mio Maintenance

Advancing relationship evolution and emotional progression.

Features built for the Orb immediately benefit the Personas. Insights from Persona progression train the Orb.

Running both costs almost nothing in extra engineering overhead. The monorepo means we don't have to guess what users want—we just let both thrive.
